Solutions for New Business

Dayta AI Limited

www.dayta.ai

Dayta AI is a SaaS software retail analytics company established in 2018. We are part of the Hong Kong Science and Technology Park (HKSTP) programme and the first batch of the Hong Kong Artificial Intelligence Lab (HKAI Lab).

We strive to develop AI, cloud-based retail analytics solutions that cater the needs of brick-and-mortar stores, under the digital transformation and big data trends. Our vision is to create a powerful integrated customer data solution for offline retailers that are easy to implement and effective to use.

Cyclops

A SaaS cloud-based AI solution that can connect surveillance cameras to acquire, evaluate and interpret customers' data.

Our solution enables users to read and understand visitors' and members' behaviour through visualized data, including traffic management; customer behavioral; and demographics analysis with add-on functions such as real-time alerts to let users make better data-driven decisions.

Gekko Lab

www.gekko.ai

Gekko Lab is an award-winning Hong Kong-based data analytics solution provider. The company specializes in OCR technology and workflow automation, empowering users' decision-making capabilities to find insights from a large amount of unstructured data. Gekko Lab's customers cover financial institutions, regulators, legal industry and public services.

LicenseFlow

LicenseFlow is a total solution which (1) automates the process of data mining, (2) provides a platform for searching, analyzing and visualizing large amount of text data in different formats. This enhances users' capability to quickly collect data to find insights from a large amount of unstructured data.

DocAnalyzer is unique with the following features: (1) context extraction for values, entities, text, paragraphs and percentage, (2) machine-reading extraction without coding required, (3) an intuitive validation interface for human validation. The solution is also built for integration with other RPA, CRM and ERP systems. The solution has been used in various public service bodies.
