## I&T Solutions Suppliers for Intelligent Business Process Automation

### Asiabots Limited

Asiabots was founded in 2017 and focuses on developing artificial intelligence technologies. Owning our self-developed Natural Language Processing (NLP) and Text-to-Speech Engine (TTS), Asiabots has launched various creative products for business situation, for example A.I. Ambassador and Broadcast A.I.. Based in Hong Kong, Asiabots is specially good in teaching A.I. to understand multi-languages, Cantonese, English and Putonghua. Aiming at visualizing artificial intelligence and applying A.I. in business environment, Asiabots is a rapidly developing enterprises with decent team and product.

ClusterTech is a leading provider of advanced I.T. solutions and consultancy in Asia Pacific. The company specialises in helping enterprises solve challenging computational problems and improve operational efficiency through customised solutions based on High Performance Computing (HPC), AI & Analytics, Cloud, and Big Data Infrastructure. Founded in 2000, ClusterTech was Asia's first HPC solution provider, and has since extended domain expertise and made advances in computing technologies for financial engineering, business intelligence, environmental sciences, smart city etc. ClusterTech has served hundreds of organizations worldwide, many of which are Fortune 500 companies.

### ClusterTech Limited

### MICology Limited

MICology is a Vertical Service Provider (VSP) in Data Visualization & Simulation (DVS) and Digital Process Automation (DPA). We provide automated data acquisition solutions to simplify manual processes and simulation services to visualize data and predict outcomes. MICology extract and unify data from several disparate sources, from physical-based to digital-based format, visualize and simulate them in interactive 3D environments to simplify development and management processes, reduce excessive time for trial and error and increase productivity.

## MindLayer Limited

MindLayer provides a seamless and AI-powered customer service solution that leverages its premium Natural Language Processing (NLP) engine and trilingual ChatBot Technology. We populate our products at any touchpoint in your customer's digital journey, making customers service available in popular messaging platforms, your company website and social media page. We provide a powerful and easy-to-use backend to build AI models and various client Software Development Kits (SDK), such as JavaScript, Android, iOS etc., so that developers can connect their existing apps or services to the AI model with just a few line of codes. We also provide integration to very common messaging apps such as WeChat, WhatsApp, Line, Facebook Messenger etc., so that businesses can instantly turn those apps into Chatbots and constitute better conversational experience with their customers.

We specialized in Artificial Intelligence, Big Data and Blockchain Technology. Recently, we extend our services into customized Robot Design with AI capabilities. Our solutions encompass a wide range of solutions from Server Solutions, Image/Video/Speech/NLP/Trends/E&M AI Analytics, Big Data Infrastructure, High-End Blockchain Cryptographic Solutions, Robotics, IoT and equipment. Our clients include Government Bodies, Airport, Railway, Insurance, Banks, Telecom, Retailers, Logistics, Shipping and more.

## Robotic Online Intelligence Ltd

Robotic Online Intelligence (ROI) helps clients solve the information overload ('infobesity') problem faced by executives and analysts, by filtering intelligence and picking signals from local sources. Founded in 2017, participant of Cyberport Incubation Programme since 2019, ROI has proven commercial value with data companies and private equity funds in Hong Kong, China and the US, in particular in the real estate sector. ROI's AI-powered market intelligence engine and Kubro™ enterprise SaaS platform help source, search, tag, filter, analyze and communicate market intelligence from publicly available sources. Most recently, ROI has launched Signallium™ | China Property and SEC Filings modules.

SenseTime is a global company focused on developing AI technologies that advance the world's economies, society and humanity for a better tomorrow. It is also the world's most-funded AI pure-play with the highest valuation. The deep learning and computer vision technologies we have developed are already powering industries spanning across education, healthcare, smart city, automotive, communications and entertainment. Today, our technologies are trusted by over 700 customers and partners around the world to help address real world challenges. We have offices in mainland China, Hong Kong, Japan, Singapore, Saudi Arabia and United Arab Emirates.
