Sapitor in Windows
Developed by Deloitte AI Institute (HK)

Transform Secure AI Interactions with Enterprise-Grade Privacy

Sapitor™, a cutting-edge AI chatbot solution by Deloitte AI Institute (HK), redefines secure, intelligent communication for professionals and businesses. Designed to operate seamlessly on laptops with or without GPU support, Sapitor combines Retrieval-Augmented Generation (RAG) capabilities, multilingual voice recognition, and robust document management to empower users handling sensitive data.

Key Features

1. **Advanced Document Management & RAG Integration**
   - Persistent Storage: Securely store and organize documents in customizable folders, with data retained for ongoing access.
   - Multi-File Handling: Upload, delete, or activate multiple documents across folders. Toggle files dynamically for RAG to refine chatbot responses.
   - Real-Time Progress Tracking: Monitor uploads with clear status updates ("Uploading – finished X/Y file(s)").
2. **Multilingual Voice-to-Text Recognition**
   - Automatic speech recognition in Cantonese, Mandarin, English, Japanese, or Korean
   - Sapitor converts speech to text instantly. Ideal for hands-free, efficient interactions.
3. **Customizable AI Experience**
   - Flexible LLM Integration: Download and switch between multiple Large Language Models (LLMs) or vision LLMs for image-based queries.
   - Personalized Settings: Switch LLMs, chat history retention, and interface styles (colors, themes) via the Settings and Style panels.
4. **Multi-Format Input Support**
   - Process text, images, and documents (with vision LLMs), enabling comprehensive analysis for tasks like contract review or visual data interpretation.
5. **Enterprise-Grade Security**
   - Built for confidentiality, Sapitor ensures end-to-end encryption and private channels, aligning with the needs of high-risk industries.

Technical Specifications
Platform: Windows 10/11 (laptops with/without GPU).
Languages Supported: Voice input in 5 languages (Cantonese, Mandarin, English, Japanese, Korean).
Storage: ??

Ideal For
1. High-Security Professions: Lawyers, doctors, financial advisors, and government officials requiring encrypted communication.
2. Remote Teams: Securely manage sensitive data from home or shared workspaces.
3. Executives & High-Net-Worth Individuals: Protect strategic or personal financial information with private AI interactions.
4. Researchers & Students: Safeguard confidential projects while leveraging AI-driven insights.

Why Sapitor?
Sapitor merges Deloitte's expertise in AI and data security with intuitive functionality, offering a future-proof solution for private knowledge management. Whether extracting insights from documents, conversing in multiple languages, or safeguarding sensitive workflows, Sapitor delivers precision and privacy at scale.

Elevate your AI interactions—securely and intelligently.
