

Private AI Agent Platform

Private AI Agent Platform

It is an advanced on-premise AI-powered chat platform that enables seamless conversations with multiple AI models. Whether for productivity, learning, or entertainment, our platform provides a dynamic and interactive experience, tailored to users' needs.

Key Features:

- **✓ Multiple AI Models** – Engage with a variety of AI models, each designed for specific tasks such as creative writing, coding assistance, general Q&A, and more.
- **✓ User-Friendly Interface** – Enjoy an intuitive and modern chat interface that works effortlessly across web and mobile devices.
- **✓ Custom AI Bots** – Create and personalize AI bots with unique behavior, instructions, and knowledge sources to match your specific requirements.
- **✓ Real-Time AI Conversations** – Get instant responses, making it ideal for brainstorming, content creation, research, and everyday inquiries.
- **✓ Secure & Scalable** – Our platform ensures data privacy, security, and robust scalability to support a growing user base

Shape Your Agent's Style Refine Agent

Primary Objective*

- Task-Oriented**
Focuses on actionable steps and problem-solving - great for workflows.
- Informative**
Prioritizes facts and clarity - best for explanations or data-heavy tasks.
- Creative**
Generates imaginative ideas or stories - ideal for brainstorming.

Target Audience (Optional)

- General Audience**
Simple language, no jargon - easy for everyone to understand
- Technical Users**
Uses industry terms and depth — tailored for experts
- Business Professionals**
Concise and data-driven — optimized for decision-makers

Response Length (Optional)

- Short**
Quick, direct answers (1-2 sentences) - perfect for fast interactions
- Medium**
Balanced explanations (2-3 paragraphs) - adds context without fluff
- Detailed**
Thorough breakdowns with examples - great for complex topics

Setting up Knowledge Base

Review & Compare LLMs' capabilities

The screenshot displays the 'Review & Test' stage of an AI agent configuration process. The top navigation bar includes tabs for 'Name & Purpose', 'Personality & Behaviour', 'Knowledge Base Setup', 'AI Model & Settings', and 'Review & Test'. Two chat windows are open, each titled 'My HR Assistant'. The left window is associated with the model 'deepseek-r1:14b' and the right with 'llama3:70b'. A 'Knowledge Base' panel on the right side of the interface shows a list of document folders. The 'Nexify HR Documents' folder is selected, and its sub-items are also checked: 'Code of Conduct & Importance...', 'Medical Claim Document', 'Notice of Typhoon / Rainstorm /...', and 'Collecting CV document'. Other folders like 'Nexify Product Documents', 'Nexify Project Documents', 'Nexify Marketing Documents', 'Nexify Sales Documents', 'Nexify Accounting Documents', and 'Nexify Security Documents' are not selected. At the bottom of the interface, there is a text input field with the placeholder 'Ask your agent a question...', a plus icon, a microphone icon, and an upward arrow icon. A 'Confirm & Create Agent' button is located at the bottom right of the configuration area.
